Wrapping machines & end-of-line solutions

Design, manufacturing, sales and after sales service for end-of-line wrapping systems

MOVITEC commits its resources exclusively to develop automatic ring wrapping machines and provide custom solutions for end-of-line processes to enable customers to be competitive and efficient

End-of-line complete solution

- Wrapping machines for palletized loads
- Integration with automatic warehouses
- Labeling and weighing equipment
- Integration with palletizing machines
- Pallet transport and buffering systems
- Integration with existing lines

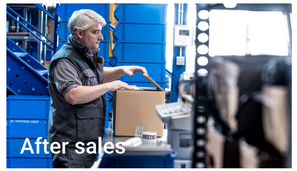

- Research on new materials and latest technology
- 3D simulations
- Search for new and customized solutions
- Programming and software development
- Technical documentation

- Manufacturing and assembling
- Installation assembled and tested before delivery
- Test facility for customer samples
- FAT in our facilities

- Technical and sales advice
- Stretch film consumption study
- Custom Layouts
- Payback simulation

- Training
- On-line diagnosis
- Key spare parts in stock
- Preventive and corrective maintenance plans

GUARANTEED SAVINGS

Pre-stretching powered system for
An optimum consumption of film

1 meter of film yields **x5**

EPS: Electronic Pre-stretch System

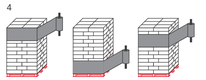

ARC: Automatic Reel Change

ACBA: Automatic Corner Board Application

Complete wrapping solutions

1. Simple wrapping from top down
2. Simple wrapping from bottom up down
3. Double wrapping beginning and ending at any point of the load's height

4. Band-type wrapping at any height
5. Waterproof or dustproof protection wrapping cycles
6. Individual wrapping of stacked pallets (with 2 welds of film) or as if they were a single pallet
