WRAPPING

# ProWrap

THE NEW INDUSTRY 4.0 STRETCH WRAPPING MACHINE

**SIAT ProWrap** is the new versatile and scalable turntable semi-automatic machine for intensive and demanding stretch film applications, able to optimize film consumption and to guarantee **full control** of all wrapping parameters throughout the cycle.

## INDUSTRY 4.0 CONCEPT TECHNOLOGY

High-end machine designed in accordance with **Industry 4.0 concept**, ProWrap ensures the customer optimization of the transit packaging solution for their specific industry while saving resources and time and supervising machine productivity (up to 30 plts/hour), its working time and film consumption.

Thanks to the advanced setting options, which consist of **12 programs and 5 operating modes**, you will be able to optimize your packaging process while increasing the stability of the wrapped load.

The list of options available, such as pressing units, roping device or a variable pre-stretch up to 400% (with double motor), allows you to equip SIAT ProWrap **according to your business needs**.

Furthermore, the option of having a different amount of film in different areas of the pallet (6 upshift zones, 6 downshift zones) guarantees savings in film.

This solution will **protect the load** during the transportation and avoid wasting film.

## KEY FEATURES

- » **New design** and long lasting structure working also in heavy duty environment (-20°C)
- » **4.0 concept** technology
- » **7" touch screen** control panel
- » **12 programs/ 5 operating modes**
- » **Variable parameters** over the pallet within the cycle (6 upshift zones, 6 downshift zones)
- » **High productivity** (up to 30 plts/h with PW750)
- » Pre-stretch **up to 400%** (with double motor)
- » **Safety-driven** technology
- » **New safety feature** on the carriage (footprint savings) and new detection safety scanner (instead of fences)

The 4.0 concept of the new ProWrap makes it extremely easy to find the **best transit packaging solution** suitable for each kind of product and to add value to your business.

## THE NEXT-GENERATION OF DESIGN

The modern and friendly design of SIAT ProWrap wrapper is extremely resistant and long-lasting, providing **high level performances** which lasts for years without particular maintenance or fixing up.

It can work without any problem also in heavy duty environment (-20°C).

NEW DESIGN

4.0 TECHNOLOGY

HIGH PRODUCTIVITY

LOAD STABILITY

COST OPTIMIZATION

## SIAT AND MAILLIS GROUP

SIAT is the famous Italian Brand of strapping hand tools, s/a wrappers and case handling machines, which forms part of the **Maillis Group**.

With **over 50 years experience**, Maillis is an essential player in Transit Packaging Solutions, designing and manufacturing complete wrapping, strapping and carton sealing systems.

Operating **5 production units around the world** and employing over **1,200 qualified employees**, Maillis provides

you with reliable system solutions, incorporating machines, consumables and services to face your everyday challenges across different industries.

Thanks to the state-of-the-art production equipment, optimized processes, premium raw materials and advanced technical know-how, we are able to cover a **wide range** of applications with unique material properties and optimized solutions.

## FULL CONTROL OF YOUR WRAPPING

The new ProWrap control panel will surprise you. The **7" color touch screen** with latest generation technology, is easy-to-use, intuitive to set and full of **high performance features**.

You won't have any problem to customize all the machine parameters and set "load zones" with different levels of holding forces. This results in **significant benefits in your productivity**: saving film, faster cycle time and optimal protection of the load.

## A SAFETY DRIVEN SOLUTION

Production **space optimization** is an important issue in all manufacturing plants. The exclusive new detection area scanner of SIAT ProWrap has been designed to guarantee **higher safety standards** and the smallest machine footprint.

Thanks to its **3 alarm zones** and the **leading-edge software**, the machine calculates a proper safety distance and stops immediately in case of the nearest point of operation hazard.

### OPTIONS

<b>Turntables configuration</b>	1650 mm	1800 mm	2200 mm	HSD
<b>Column heights</b>	2200 mm	2600 mm	3000 mm	
<b>Carriages</b>	Electromagnetic brake (FM)	Power pre-stretch up to 250% (PW, PWT, PW750)	Double motor pre-stretch up to 400% (DM)	
<b>Power supply</b>	220/240V 1Ph	400V 3Ph (50/60Hz+N)	Other on request	
<b>Programs</b>	Up to 12 programs			

- » Roping and banding device (electric/pneumatic)
- » Top sheet and edge-board application
- » Pressing unit
- » Remote control
- » Pit frame
- » Lift frame
- » Scale
- » Loading ramp
- » High ambient version
- » Inox version
- » Cutting system
- » Cut & welding system
- » Cut & attaching system (without blowing)
- » Safety laser scan
- » Integrated weighing system
